

Liquid Receivers LRA-A/B/C Series

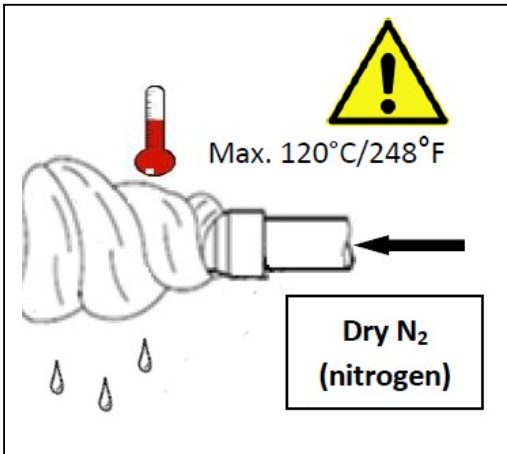

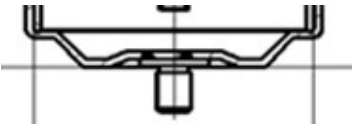

Applicable to the fluids of GROUP 1 and 2 according to Pressure Equipment Directive 2014/68/EU.
Operation is only permitted if the installation was carried out in accordance with legal regulations.
Safety class according to EN378.

Design pressure (PS): 35bar
Design temperature (TS): -30 °C to +120 °C

Safety instructions:

- The installation should be conducted by competent experts with fundamental knowledge of refrigeration systems, refrigerants and refrigeration oils only.
- Improper use can lead to material damage or personal injury.
- Keeping all instructions (pressure, temperature, media) creates the condition for a reliable function.
- Before charging the refrigeration system with refrigerants you have to make sure that the system including liquid receiver, is tight. Do not use oxygen for this test.
- Please pay attention to all legal regulations for prevention of accidents by dealing with refrigerants, refrigeration oils or handling with filled up refrigeration systems etc.
- The liquid receiver must not be opened while they are under pressure and until the vessel has cooled down.

---	---

1	<p>English: Install liquid receiver vertically in refrigeration plants exclusively. 中文: 仅在制冷系统中垂直安装储液器。 Français: Installer le réservoir de liquide verticalement dans les installations de réfrigération exclusivement. Deutsch: Flüssigkeitssammler in der Kälteanlage ausschließlich senkrecht einbauen. Italiano: Installare il ricevitore di liquido in verticale esclusivamente negli impianti di refrigerazione. Español: Instalar receptor de líquido en vertical en plantas frigoríficas exclusivamente.</p>
2	<p>English: Braze with proper material (SilFos 15 in priority) and use wet cloth for brazing protection. 中文: 使用合适的材料进行钎焊（优先使用 SilFos 15）并使用湿布进行钎焊保护。 Français: Brasez avec un matériau approprié (SilFos 15 en priorité) et utilisez un chiffon humide pour protéger le brasage. Deutsch: Löten Sie mit geeignetem Material (vorrangig SilFos 15) und verwenden Sie ein feuchtes Tuch als Lötenschutz. Italiano: Brasare con materiale idoneo (prioritariamente SilFos 15) e utilizzare un panno umido per la protezione dalla brasatura. Español: Suelde con el material adecuado (prioritariamente SilFos 15) y use un paño húmedo para proteger la soldadura.</p>
3	<p>English: Tighten threaded connections according to the mounting torque showed in the table. 中文: 根据表中所示的安装扭矩拧紧螺纹连接 Français: Serrer les raccords filetés selon le couple de montage indiqué dans le tableau. Deutsch: Ziehen Sie die Schraubverbindungen mit dem in der Tabelle angegebenen Anzugsdrehmoment an. Italiano: Serrare le connessioni filettate secondo la coppia di montaggio mostrata nella tabella. Español: Apriete las conexiones roscadas de acuerdo con el torque de montaje que se muestra en la tabla.</p>
