介质温度 TS Fluid: -40°C ...+120°C (-40°F...+248°F)

连接方式/Connections

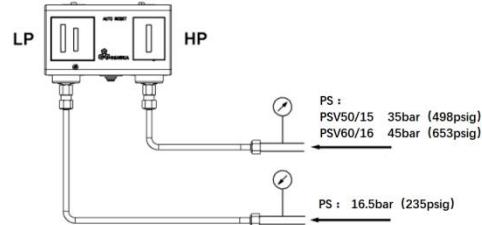

接头连接方式可根据客户要求提供，接头配备防尘帽，防止异物进入感压部件，导致进气口堵塞，影响产品动作性能。

The connection mode of joint can be provided according to customer's requirement. The joint is equipped with a dustproof cap to prevent foreign matter from entering the pressure sensitive component, which leads to the blockage of the air inlet and affects the performance.

Capillary type can be customized to add a depressor pin.
